"A man better have a live rattlescale in his probet than a counterfell dollar carried as a poster-piece," wald Importor Lawrence of the treasury department to a Minneapolis Journal man when talking about the carrying of solution or hills which one knows to be ministerfeit.

He goes from the store, my to a salson, where he bays a driple, or to some drug store to get something or other—it matters not where he goes, provided there is one of those 'smart' young follows be-hind the counter who is always ready to take somebody up on something or other.

"Paying for his purchase with one of the dollars the man behind the bur, or the counter, as the case may be, flings the dollar back with the remark that it is counterfeit. The purchaser, somewhat abashed and not liking the eying of the crowd around, begins to make excuses to the effect that he did not know it was counterfeit, and so on, and the clerk, who is anxious to make a record as a counterfeit detective, suddenly calls in the police and the man is arrested and searchest. On his person is found the other counterfult dollar. and the possession of the two dollars is prima facie evidence that he intended to pass both of them, and that man ham't got enough friends in the world to keep him out of the penitentiary. True, it looks hard, but that man had no business earrying around a counter-feit coin for a packet-piece or any other reason. It is a plain violation of the law to carry counterfeit money about with you, something which many peo-

"Suppose I happen to know that a man, a cashier in one of the well-knewn banks of Minneapolis or St. Paul for instance, has a bad twenty-dollar bill in his possession. Igo into that bank, call him by name, and ask him for that bill. He says he hasn't got it. for that bill. He says he hasn't got it.

'But,' I rejoin, 'you did have such a
bill yesterday in your possession, for I
have the testimony of two reputable

to some parties. Now I want that bill;
you have no business with it.' He demurs and makes various excuses and does not give me any satisfaction. What do you suppose I do? I go out and got a search warrant and go through every dollar of money in that bank, deliar by deliar or bill by bill, until I find that counterfeit twentydollar bill and then I confiscate it. There used to be no law against this sort of thing, but there is one now, and the public generally ought to know the facts in the case. And formerly it was not an offense to make the dies which are used in counterfeiting-anybody could make them and anybody could have them in their possession so ng as they were not used, but that has all been changed now."

CALIFORNIA FOR HEALTH. Just the Place for the Restoration of

I am often asked what part of southern California is best adapted to cer-tain individual cases. This is, of course, largely a matter of personal and constitutional election. As a rule, however, I may say that rheomatic, neuralgie and laryngeal cases do better in interior, since the sea air loses much of its severity in traveling inland between a hot sun and a warm soil. Convalescing cases recovering from some long and tedious Bluess, and those suffering from nervous prostration, insomnia, or the debilitated stages of advanced consumption, are more benefited by the bracing air of the const-the great invariability here The special committee appointed to experienced and the greater amount of atmospheric moisture having the deared Mrs. Richards to deed the right of aired effect, says a writer in the Cali-

It is the absence of enervating heat during the day or night that permits of so many restorations of shattered health which would elsewhere be impossible. For this reason invalids have been induced to adopt a Californian summer for a climatic change or for a residence, and our eastern friends can readily see that it is erroneous to consider California only as a winter re-

To the tourist the region offers every conceivable variety of temperature met with in either Europe, Africa or Asin. The shores of Africa and the interior of the great Sahara; the highlamis of Spain and the low hills and plains of Italy, the abrupt Apenaines and the more gigantic Aips of either Switzeriand or Bayaria, the heatherclad hills of Scotland and the sunny islets of the Greek archipolago-all have here their counterparts. Yet with this strange diversity the climatic factorial influence of the great heated desert and the vast, cold ocean combine to produce a homogeneity that makes California unique among the known regions of the west.

A WORD IN KINDNESS.

It Kept an Excited flores from Ruentog Away.

"I don't know when I have seen a more striking illustration of the power of kindness," said a New Yorker the other day to a Sun man. "A man drove a grocery wagon up to the house opposite mine the other morning and started in to deliver some groceries. He had expected the horse to stand, but the horse kept on moving. The man turned around and threw a potato at him, but the horse didn't mind that a bit-he kept right on walking.

Whea, there, says the man, but the

horse didn't whom. Waon, you may the man, but the hoese didn't stop at all; in fact he moved just a little bit factor. That the most remarkable thing about him now was the change in his appearance. Yes couldn't have told exactly what it was He was'nt any bigger than he had been nor any smaller. He just seemed to sort of radiate it, but there emild be no possible doubtabout what it meant. It meant that he was ready and determined, upon the slightest further provceation, to kirk the wagon into doublepointed toothpicks and make jam of

" Whoa. Bill" said the man, in a friendly, kindly tone. Before you knew it the borse had settled into a peaceful attitude and the man had disappeared within the house,"

A Clayer Retort.

A young globe-trotter, bearing an ilbateless French name, was bolding forth during a dinner in the Fanbourg St. Germinin at Parts about the levelyness of the island of Tabiti, and describing in glowing colors the marvelous hearty of the women of that French dependency. With the object of learning whether the young traveler had restricted his observations to the fair sex, as one might have been tempted to believe from the tenor of his marks, one of the Barona Rothschild who was present centured to inquire if he had remarked saything else worthy of note in consection with the island. Resenting the baron's inquiry, he renied: "Yes, what struck me much was

that there were no Jews and to pigs to be seen there." "Is that so?" ex-claimed the baron, in no wise discon-certed. "Then let you and me go there together; we shall make our fortune.
